AV-BASE Announces: Availability of WinAir Document Management Module

London, Ontario, Canada – July 23, 2009 - AV-BASE Systems announced today that the WinAir Document Management module (DocMan) is available for the WinAir Express, Pro-SQL and Enterprise products.

The WinAir product suite was created exclusively for the aviation industry to improve fleet maintenance management, inventory control, operation costs and regulatory compliance. The DocMan module allows WinAir users to Attach and/or Link external resources in a variety of formats such as text docs, pdf's, images, url's, audio files, video files etc. The use of DocMan streamlines the document management processes and gives WinAir users quick and easy access to critical information. The overall benefits include improved workflow, rapid aircraft repair turnaround, optimized efficiency and a more reliable and efficient aircraft maintenance program.

“Every day our customers are faced with the task of increasing efficiency and decreasing associated maintenance costs while ensuring that safety and quality standards are continually met. The WinAir DocMan module allows users to achieve this by providing simple access to all key information regarding purchasing information, inventory control, production, maintenance forecasting, cost accounting and invoice processing.” states Bert Verger, Vice President, AV-BASE Systems Inc.

Document Links and Attachments may be added to all sections of WinAir such as:

Personnel: licenses, certificates, training records etc.

Vendors: capability listings, websites, audit reports etc.

Customers: account status documents, websites, correspondence etc.

Master Parts: IPC diagrams, SBs/ADs, modifications, photos etc.

Inventory Batches: release certificates, strip reports, packing slips etc.

Maintenance Program: detailed requirements, engineering drawings, approvals, procedures etc.

Work Completion: signed task cards, photos, x-rays, completed check sheets etc.

The WinAir DocMan solution simplifies document management challenges by providing easy access to information spread across multiple information systems. WinAir users can simply update and distribute technical publications on the go thus allowing other users ready access to critical information. Overall, people are able to spend more time doing their job and less time searching for information.

Contact AV-BASE Systems at sales@av-basesystems.com for more information on WinAir DocMan.

###
